4th October 2020

Dear Families,

I was notified that a member of our administration team was tested positive for Covid 19 on Friday evening. The member of staff had not had contact with any children or been in classrooms or used any communal areas that the children use.

I contacted the Coronavirus advice line at the DfE and they confirmed that the children at Fleecefield were not at risk and the school should take no further action as the children were safe to come in.

The school remains open and your child should continue to attend as normal if they remain well. I would like to stress the importance of following the guidance so we can keep ourselves and each other safe.

What to do if your child develops symptoms of COVID 19

If your child develops symptoms of COVID-19, they must not come to school and should remain at home for at least 10 days from the date when their symptoms appeared. Anyone with symptoms will be eligible for testing and this can be arranged via <https://www.nhs.uk/ask-for-a-coronavirus-test> or by calling 119.

All other household members who remain well, must stay at home and not leave the house for 14 days. This includes anyone in your ‘Support Bubble’. The 14-day period starts from the day when the first person in the house became ill.

Household members should not go to work, school or public areas and exercise should be taken within the home.

Symptoms

The most common symptoms of coronavirus (COVID-19) are recent onset of:

- a new continuous cough
- a high temperature
- a loss of, or change in, your normal sense of taste or smell (anosmia)

For most people, coronavirus (COVID-19) will be a mild illness.

If your child does develop symptoms, you can seek advice from the nhs.uk website at <https://www.nhs.uk/conditions/coronavirus-covid-19/check-if-you-have-coronavirus-symptoms/>. If you are concerned about your child’s symptoms, or they are worsening you can seek advice from NHS 111 at <https://111.nhs.uk/> or by phoning 111.

How to stop COVID-19 spreading

There are things you can do to help reduce the risk of you and anyone you live with getting ill with COVID-19

Do

- wash your hands with soap and water often – do this for at least 20 seconds
- use hand sanitiser gel if soap and water are not available
- wash your hands as soon as you get home
- cover your mouth and nose with a tissue or your sleeve (not your hands) when you cough or sneeze
- put used tissues in the bin immediately and wash your hands afterwards

I will continue to keep you informed of any further developments and please be assured that we are following scientific and Government guidelines to ensure the safety of our whole school community.

Yours sincerely

A Goldwater

Headteacher
